

Home Line **H2YDRO**

THE IDEAL SOLUTION TO MEET EVERY NEED, EVEN
AT HOME:
ENJOY THE PLEASURE OF HYDROGEN-RICH WATER
RIGHT IN YOUR OWN KITCHEN.

UPPERCOUNTER WATERCOOLER

H2YDRO

High performance, minimal space.

H2YDRO is the compact water dispenser that combines design, quality, and functionality, making it ideal for your kitchen.

Connected directly to the water supply, it dispenses still and hydrogen-rich water, enriched by the integrated hydrogen module with an H2 concentration ranging from 800 to 1600 ppb.

- *Standard features:*
- *Anti-flooding system*
- *UV LED Spider bactericidal system*
- *Hydrogen module*
- *Filter head*
- *Digital flow meter*

Available colors

Dispenser	Weight	PPB H2	Dimensions (LxPxH)*
 H2YDRO	10 kg	800-1600 ppb	20x39x44 cm

*drip tray included

OTHER TECHNICAL FEATURES

- Body material: **painted sheet metal**
- Water supply pressure: **2- 3,5 bar**
- Operating ambient temperature: **10 - 35° C**
- Inlet water temperature (min-max): **10 - 25° C**
- Power supply: **220 V – 50 Hz single-phase**
- **On/off switch**
- Power consumption: **130 W / 80 W**

USABLE WITH REFINER
REFINER 250 • 350 • 500

USABLE ONLY WITH
DRINKING WATER

Vertical operation. **MAX inlet temperature:** 35°C. **MAX operating pressure:** 3,5 bar

NOTE: this equipment requires regular maintenance periodically to ensure the requirements of potability of the drinking water treated and maintenance improvements as declared by the producer. Do not use with microbiologically dangerous water. After long periods of inactivity (3/4 week) to keep it carefully sanitizing or provide for the replacement of the filter.
